# Game Overview

- Title : STELLARIA
- Genre : Action,Adventure,Open World,RPG,Singel Player
- Target : Casual Players (Age 14-35)
- Platforms : Pc ,PS4,Nintendo switch ,Xbox

## Game Concept

you play as a 33 years old captain named Melio who is considered to be one of the most lazy persons in the fictional world of Stellaria ,he is having trouble making ends meet and his crew of pirates is only composed of him and his atlantis named Vicius who will leave him because he couldn't pay him.

But that's when an unexpected catastrophe happened in his world making the majority of humans become ill and with that his little daughter Elizabeth ,so that's when he decides he has to stop being lazy and go explore these new islands that have popped up out of nowhere and which could explain this strange illness .

The game is an open world game set in the world of Stellaria, a world filled with floating islands and where 4 big kingdoms rule the world and where pirates are like super heroes who protect the world from every possible danger or maybe like super villains who will seek to destroy the world .

# Gameplay

## Game progression

the game is an open world the player will be free to do whatever he wants in the game whether he want to start directly the main quest and focus in the main story or if he wants to do some side quests and enjoy exploring the world on his own ,through the game he will be able to interact with different npcs who can give him different quests that he can do ,he can also go explore the outside world in his airship and travel from island to island and discover different islands with different people their and with different cultures and different types of monsters living their that he can fight ,he will also be able to switch atlantis in fights so he can do different combos (he can carry up to 3 atlantis with him)and the more he progresses in the game the higher the difficulty of the game gets and the stronger the monsters the harder it will get for the player to defeat them

## Missions/challenges/tasks

Stellaria is a game that is highly dependent on the aspect of exploration and self discovery therefore the way the player will approach the game will vary from person to person with the overall goal of stopping this terrible illness and killing the bosses that reside in each island.

The Main Quests

Side Missions

### The Main Quests

the main quest of the game is to stop the illness that is ravaging this world by exploring the islands and killing the bosses in each one of them but throughout the game there will be some unexpected turn of events that will have the player do some detours and break the routine of going into every single island and killing the monsters some of the things that can break this routine are :

- pirates and bandits that he can encounter along the way and that can lead to some other quests
- the damage to his airship that will lead the player to go and stop in some village island to try and repair it which can lead to some other quest

## Side Missions

Stellaria also offers a lot of side quest that are scattered all around the world which the player can to gain some rewards and other things some of them are :

- The return of the lazy one:in this quest the player will have to go search for one of his old friends that was working with him (as a cook) and he will try to motivate him to go work with him like the old times
- Santa Maria: this quest will be given to the player by some old man named Price telling him to go search for the legendary boat, the most greatest one through history, the Santa Maria and that if he were to find it he will gain a very huge upgrade to his boat

## Playflow

Stellaria's game flow is highly dependant on the open world aspect of the game giving the player the free access to navigate the map and explore as he wishes (there are some restrictions ) this freedom gives the player a sense of immersion it makes him feel like he belongs to this world ,this freedom combined with the moments of high intensity created by the constant dangers that the monsters provide in the different islands especially the boss fights that require the full concentration of the player so that he can land all of his combos and avoid damage as much as possible.

## Puzzles

through his adventure the player will find some puzzles scattered all around the island well hidden by the nature in a form of small dungeons , this puzzles will uncover the hidden truth about the world he is living in and the mystery behind the atlantis and their origin he will also find some hidden treasure and artefacts used in the ancient age that he could use to upgrade his airship .

And through his exploration of this dungeons he will find a very special atlantis living in one of this dungeons named Atlas who will give him the quest of exploring all of this secret dungeons if he wants to add him to his crew.

## Actions

in the world of stellaria there are a lot of different actions that the player can do actions which will help him advance in the game such as :

## Talking to NPC's

throughout his journey the player will meet different NPCs that he can talk to ,this NPCs can help him in different ways like giving him side quests or by guiding him the world and telling him some secret spots in the map some of them may also become his companions because he can ask them to join his crew (this applies to Atlantis and normal humans)

## Fast travel

the player will be able to fast travel from island to island after he activates some special totems scattered in the specified island in the landing zone

## Buying items

the player can buy different items in the game this items can go from potions that can give him different buffs depending on their types or some crafting items or items that he can use to upgrade his ship ,he can also buy food that he uses as heal

## Upgrading his AirShip

the player will be able to upgrade his ship in the game in special islands called Stop Islands where he can refill his ship ,repair it and upgrade it by using special items .The upgrades can go from speed boost to creation of Canons

# Combat

there is two types of combat system in the game which are:

- airship combat:the player will fight other pirates with his ship in his journey ,this system revolves around the aspect of hitting the weak point of the enemy ship by using the canons and other weapons the player will have the choice to either destroy the enemy ship or to abord it and fight the enemy crew to steal their resources and items.
- Monster combat : the player will face different monsters throughout his journey depending on the island they are living in , in this game pirates fights using their atlantis which are people that are capable to transform into weapons ,so the player throughout the story will be able to gather his own crew of atlantis and choose which one he will want to fight with ,he will be able to take with him 3 atlantis in a fight with which he can switch to create different combos to do more damage to the enemies by changing from light attack and heavy attacks and each atlantis will have a set of abilities they provide the player and the more the player increases his relationship with the atlantis the more he will unlock abilities and combos (passive and active abilities) and there are 5 levels for each atlantis
- buffs and debuffs:when fighting monsters and enemies he will receive some debuffs like poisoning,stun,cold,paralysis,burn,hemorrhage...etc depending on the monster he is fighting making him change the way he fights every monster because there are some attacks that will be more efficient against some type of monsters and some won't be that efficient , he will also be able to either buy or brew potions that can help him in his fights by either making him lose his debuffs or by giving him strength boosts or to heal him...etc
- When fighting monsters the player will have the freedom to either choose to fight or to avoid the fight but when the player will face Bosses he will be locked in a zone that he won't be able to escape before killing the boss.

# Physics

The physics of the game will be the same as the one that we have in the real world ,the player will also be able to take advantage of the physics in some situations when fighting monsters.

# Economy

The main currency of the world of stellaria is gold coins ,the player will be able to gain them by finishing quests and by trading with the famous marchand Djamel by selling to him his loots he gathered from the monsters ,there will also some bounty quests where he will be able to track some criminals and he will gain money by either killing the criminal or by bringing him alive (the amount depends on the difficulty and if he is dead or alive).

# objects

The itemsin the game the player will be able to gather a lot of different items that he can use in different ways some of these items are:

- Potions:the player will be able to use them to gain some strength boosts or to heal himself some of these potions are:
  - healing potions=they have a red color and they can be use to heal the player
  - fire resistance=this potions is uses to avoid getting burnt while fighting fire monsters
  - Report=this one is used to gain the ability to breath for a certain amount of time under water.
- Crafting and upgrading items :the player will be able to either gather this items by killing and looting monsters or by buying them from shops some of them are:
  - glu=this one is a common item dropped by killing slimes and it can be used to brew certain potions.
  - fur=this item is dropped by monsters who have fur like morudomunto in the frozen island
- Quest items:quest items will be given to the player by NPCs to complete certain specific quests .

# Replaying and saving

the saving in the game consists of two methods :

-auto saving that happens every 30 minutes.

-manual saving that can be done by the player at any time of the game but not when he is in a fight because that would be cheating.

## Mechanics

**Health bar:**the player will have a health bar that will indicate his health ,he will lose health by taking damage and will gain health by using potions or eating food and resting he will also be able to increase his health bar throught the game using some special items that he will craft .

**Mana bar:**the player will have a mana bar representing the ability of each of his Atlantis the more combos he does the faster it will be filed and then he will be able the signature moves of his Atlantis that will do much more damage than a regular attacks(each Atlantis has its own mana bar).

**Intoxication bar:**the player will have an intoxication bar that will be filled by using potions the more potions he will use the higher his intoxication level will be and the more disadvantages he will have that's why he will have to kepp tract of and avoid using too much potions so that he wont have disadvantages.

**Atlantis Levels:**the player will meet a lot of Atlantis in the game that he will be able to add to his crew and fight with them , and each Atlantis will have 5 levels of relationship the player will be able to gain levels with the Atlantis by fighting with them and by making small interactions with them ,and witch each level advancement there will be a small cinematic and event with that character and after that the weapon will get more stronger and it will unlock a new ability or a new combos (passive or active ability).

# Story setting and character

## story narrative

the story takes place in the world of stellaria , a world filled with floating islands everywhere and where 4 kingdoms are clashing against each other everyday to see who has the best pirates in the world that's when all of a sudden a huge catastrophe takes the world by surprise and makes a huge amount of people become strangely ill with an incurable illness and with that also came the appearance of 6 undefined islands who seem to be related to this strange illness ,and that's when the ruler of each kingdom will call out all of their courageous pirates to go and explore this dangerous islands ensuring that the ones who will find a remedy to this disaster will be handsomely rewarded and thus our protagonist will decide to go in this journey to try and find a cure to his daughter and maybe why not become rich in the process ,but what he doesn't know is that this journey is far from being simple and that he will have to face a lot of different monsters that change depending on the island he will set foot on ,but monsters aren't the only probleme pirates and bandits will also be part of the game as they too will try to take advantage of this situation .

# Interface

## Visual System

### Menu elements

There are 5 menu styles , every time the player enters a new land the menu style will change within the theme of the island, it helps the game to be coherent and make the player feel every island he's entering.

#### fire style

this style goes with the fire island, it's kinda a red, black and gray style with a cloudy world, it gives the feeling of hotness

#### ice style

The ice style suits the frozen island ,it goes with the calm color like light blue, white and transparente, it gives the feeling of cold and calmness. Because of this theme, the player will feel that he is alone in the island

## earth style

suits the earth island, the green and brown are the most common colors in this theme, it's to give the feel of the woods

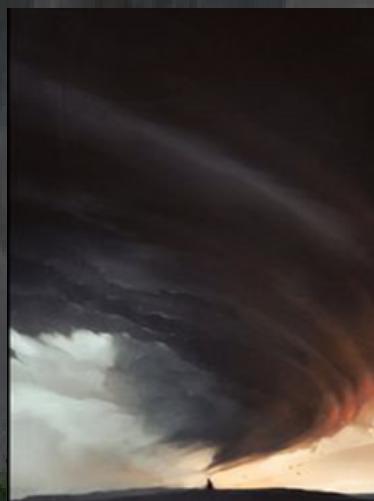

## water style

the water theme goes with the water island and it's one of the most beautiful styles in this game, the colors are kinda the ice theme: white and blue the color of water

## air style

the player will find this style in the air island , it's make him feel like he is in an empty world where there is nothing except air, clouds and his sound and some tournados , the dominant color is gray

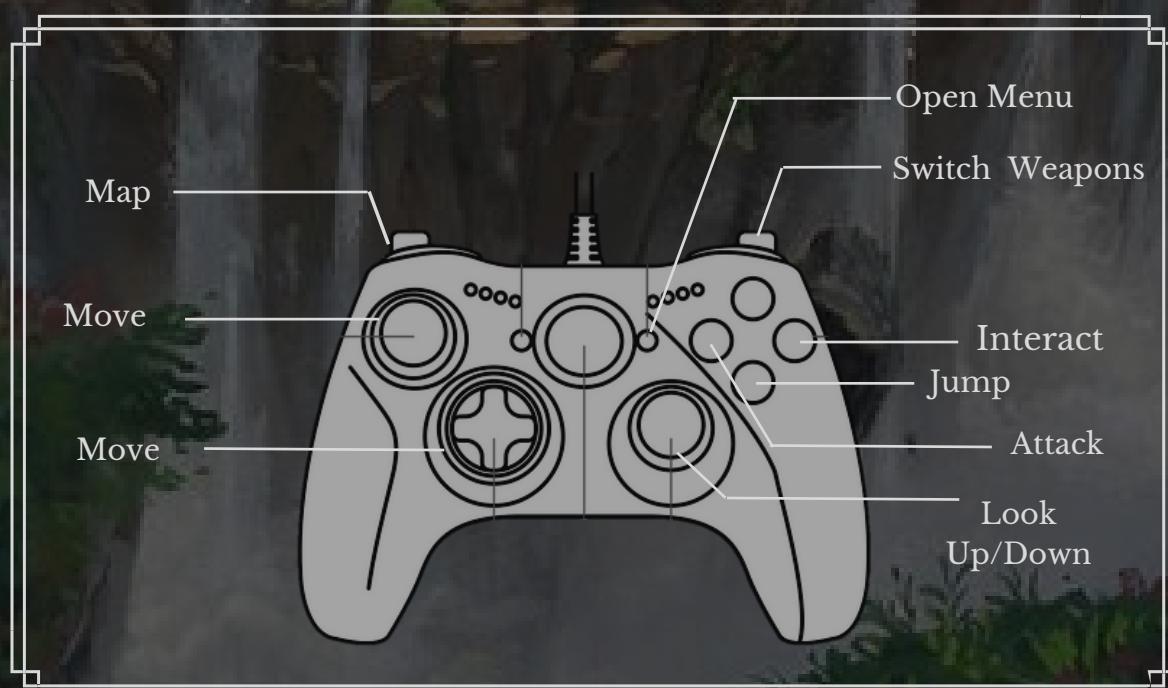

# Control system

The game can be played on computer and consoles as well which means player can use the keyboard or the controller to play the game .but also there aren't that much commands the are stable ,and can be customized by the player

## Keyboard

Move Forward	w	Attack	R shift
Move Backward	s	Map	M
Move Left	a	character screen	C
Move Right	d	Switch Weapons	1
Jump	Space	Switch Weapons	2
Open Menu	F3	Switch Weapons	3

## Controller

# Audio -music -sounds

The music sound in this game while the player explores the world and go for the missions, will make the player feel the pirates vibes and help him understand the game environment, navigate, and merge into the gameplay and the most important thing that the player will feel that like he is really in an adventure world, it's will make him excited to continue the game , also the music and sounds effects will help the player to complete concentration and focus with the game and enjoy it .

- The main music of the game is the basic pirates sound just to make the player feel that he is in a world of pirates even if the game world is in the sky Here is an example for the main music: (vid1)
- for the fights soundtracks, each fight with a monster will have its own , this soundtracks make the player feel in danger, it gives him that kind of excitement to win the fight Here is an example for the fights soundtracks: (vid 2)
- also when the character dies in the game , a soundtrack will appear with a cream from the character to make the player feel sadness , and to make him want to replay the game(vid3)
- Also there are the sound effects of fighting like the monsters screams.. and when the character picks an object it will be a sound of picking something like a gun or another object (vid4)

the videos are in the drive

# Game art

- The design of our game is so unique because it looks kinda realistic and cartoonish at the same time. The eyes of the player will enjoy the view of our world because of the variety of places and areas in the game .
- The colors blend very well and are good to watch while playing because there are plenty of colors that match together .
- There are a lot of details and assets in the game just to make the areas look different.
- about the characters, there is a very big design variety for theme because of the existence of monsters and the atlantis . Each character or monster has his own design which makes everyone special .

# THE ENDING

For a game full of creativity like our game, it needs a creative ending too so for the ending:

After our protagonist and his crew will win the last fight against Joseph, SORA will forgive his people and heal all of them from that illness and of course so as Melio's daughter, Melio will become the most famous person in this world but, suddenly something strange will happen !!

Melio wakes up from his sleep and realizes that all of that was a dream ! (as we describe him he is a lazy man so he sleeps a lot and he sees strange dreams every time), after that Melio was afraid that his daughter would get sick and he wouldn't have anything to do! so he decided to stop being lazy and work for his daughter
